

Are you the Control Systems Network Specialist who is Equipped for Impact?

Do you as Control Systems Network Specialist want to be part of a world-wide-operating team of innovators? Do you have what it takes to make an impact? And do you have a Bachelor degree, preferably in a technical area (such as Mechanical-, Electrical engineering or Maritime), Network knowledge (think of Switches, Routers, Firewalls, VLANs, VPNs) and knowledge of Windows 7 and 10 and Linux (DHCP, DNS, Samba, KVM, Asterisk)?

Yes? Please keep reading. We might have the job you as Control Systems Network Specialist are looking for.

First, let us briefly introduce ourselves.

Pleased to meet you, we are Huisman. We develop step changing technical solutions and translate these into the design and construction of the largest construction equipment. For decades, we have been working all over the world for offshore wind, geothermal, oil & gas, leisure and civil industries. We design and produce in-house and deliver our turn-key products to our clients worldwide. Clients choose us for our entrepreneurial spirit, skills, reliability, and innovative solutions. Examples? What to think of our HM100 Land Drilling Rig? So, if you join Huisman make sure you are equipped for impact. In other words, surprise us, our clients and ... yourself!

***As Control Systems Network Specialist, you are
Connecting the Dots
-Daan Willemsen, Group Engineer-***

We ask a lot of you. However, we also have a lot to offer.

A challenging position in which you can stretch your horizon within a vibrant and international operating organisation, with opportunities for personal development and growth. You will become part of a dynamic and professional organisation where innovation, quality, flexibility and creativity are key to meet our company goals. In addition to our inspiring atmosphere, we offer an excellent benefits package tailored to your background and experience.

What will you be doing working as a Control Systems Network Specialist for Huisman?

As Control Systems Network Specialist, you are responsible for Commissioning of equipment, possibly on site, during the commissioning phase of a project. Your will be:

- Setting-up, maintaining and documenting network and network applications standardization
- Investigating and testing network technologies and advising about applying these technologies within the equipment of Huisman
- Providing after-sales service to customers
- Preparing configurations for network equipment where needed

Wondering if you are equipped for impact? Ideally, you as Control Systems Network Specialist are:

- Accurate, you have an eye for detail
- Able to adapt quickly to new requirements and know how to prioritise
- Flexible and creative
- Analytical and you prefer a systematic way of working
- Proactive and persuasive
- Result and client orientated

- Willing to travel

To conclude, some practical things we need you to have:

- An EU passport / valid work permit for the Netherlands
- A practical disposition and a good command of the English language orally and in writing.
