

# Climate-tech start-up search for a **Head of Development**

## Background information

[Greencast.io](https://greencast.io) is a climate-tech software start-up that helps companies gain real-time insights in their CO<sub>2</sub>e emissions by means of a smart conversion of their financial data. This way, we offer our customers detailed, real-time insights into their emission hotspots to achieve concrete emission reductions, fast.

[Greencast.io](https://greencast.io) was set up by ex-TU Delft students and has been awarded with the TU Delft Start-up Energy Voucher.

## Your profile

Willing to take the leap into start-up land. Ambitious, committed, and optimistic individual with a good understanding of how to build robust systems.

- MSc in a relevant field AI/ML, CS, Systems & Control, etc.
- Strong software development/programming skills
- Deep understanding of technology;
- Excellent communicator;
- Flexible and solution-driven;
- Organized and self-sufficient.

## Your responsibility

As we are approaching a pilot launch in early 2022, we are looking for an ambitious Head of Development to help build our product and expand our development team.

## Our offer

- A full-time job as Greencast's Head of Development;
- An inspiring and fast-paced environment with endless growth opportunities;
- An attractive equity compensation package and the chance to build your own team.

Up for a coffee?
