R&D expenses

€3.3 bn

Global team of over

39,000+

and 122 nationalities

tin droplets

50,000

times per second, hitting each droplet twice.

EUV light at a wavelength

13.5 nm

ASML

ASML is changing the world, one nanometer at a time! We're a high-tech, Netherlands-based company manufacturing complex lithography systems that chipmakers use to produce integrated circuits – aka microchips.

Our machines help create the electronics you use in your daily life. In the past three decades, we have grown from a startup to a multinational company with over 60 locations globally and annual net sales of €21 billion in 2022.

Behind ASML's innovation hides true talent. Our researchers, engineers, scientists and manufacturing specialists, as well as our high-tech hardware and software experts, make the impossible happen every day.

We invest around €3.3 billion per year in R&D, giving our teams the freedom, support and resources to experiment, test and push the boundaries of technology. They work in close-knit, multidisciplinary teams, learning and growing along with the company.
